

## RRD RELIGION

"Celebrating a vision "

Sizes: 11,5-10-9-8-7-6-5  
Program: WAVE

RRD has been the first brand to ever build a specific kite for waves. For our Type Wave launched in 2002, we have kept always an eye on a specific kite that would be designed to excel in the waves. After the introduction of bow and D-shape kites and new innovative bridle designs, this kite puts together a super short leading edge to maximize turning speed with a bullet proof Dacron body construction specifically positioned on the hi-tension areas of the kite to prevent breakage in the surf. The religion will be the right answer for those needing a new path to follow!

### Features

- Silly Turning speed;
- Easy to handle Power;
- Stable on your head;
- Instant Water re-launching;
- **Bullet proof wave construction.**

### Technology of construction

- New SPS system with a new designed inflating valve
- LE Parallel seams for maximum strenght and lower stretching on leech area
- Horizontal seams in the maximum profile areas for optimized shape
- Insignia double tape leech
- PVC round label strut end protectors
- Metallic PU strut end reinforcements
- DP 175 LL Dacron
- Tejin T9600 Canopy
- New moulded struts protectors
- New PVC Inflating valves protectors
